

***Appendix XIX. Retrofit and Rehabilitation Program***

***This Page Left Intentionally Blank.***

## ***Retrofit and Rehabilitation Program***

### **1.0 Introduction**

The Regional Water Quality Control Board, San Diego Region (RWQCB) Order No. R9-2013-0001 (Municipal Permit or Permit) requires the 18 municipalities in San Diego County, the County of San Diego, the San Diego County Regional Airport Authority, and the San Diego Unified Port District, including the City of San Diego (City) to develop a program that will retrofit areas of existing development and a program to rehabilitate streams, channels, and/or habitats within the City's jurisdiction. Addressing the highest priority water quality conditions (HPWQCs) for each Watershed Management Area (WMA) is a key goal of this program. The City's retrofit and rehabilitation program may be modified through an adaptive management process over the course of the Permit term.

### **2.0 Program Organization**

The City does not maintain one overarching retrofit and rehabilitation program. Rather, the City has several different programs that contribute to retrofits or stream, channel, and/or habitat rehabilitation efforts within areas of existing development, as summarized below:

- Alternative compliance provisions for development projects, which allow offsite retrofit or rehabilitation projects in lieu of meeting the relevant storm water requirements solely through onsite practices. Because this effort is currently under development, the process and responsible departments will be identified in the future.
- Obtaining grants for storm water retrofits or stream, channel, and/or habitat rehabilitation projects led by the Transportation & Storm Water Department, Storm Water Division.
- Implementing retrofit or rehabilitation projects undertaken as mitigation measures through the Master Maintenance Program for channel maintenance, led by the Storm Water Division.
- Implementing projects, typically green infrastructure or other structural water quality improvement BMPs, as part of the City's efforts to comply with applicable Total Maximum Daily Load (TMDL) requirements. The Storm Water Division leads TMDL compliance efforts.

### **3.0 Candidate Projects**

The Municipal Permit requires the City to identify candidate retrofit and stream rehabilitation projects. When resources to complete a retrofit or stream restoration project become available, the list of candidate projects is a useful resource. Retrofit or rehabilitation projects that are not

on the candidate project list may also be implemented; the presence of the candidate project list does not preclude projects that are not included on the list from being pursued.

The City has developed an initial candidate project list (Attachment 1) that incorporates projects identified in the regional Watershed Management Area Analysis (WMAA) and in previous planning efforts, including its Comprehensive Load Reduction Plan documents, which were prepared in response to TMDLs. The City is also currently assessing channel rehabilitation and retrofit opportunities for a subset of channels included in the Master Maintenance Program through its Channel Maintenance Special Study (CMSS).

A legal agreement<sup>1</sup> related to the Master Maintenance Program requires a CMSS be completed to evaluate the purpose, need, and alternatives to channel maintenance activities for channels maintained during the first two years of Master Maintenance Program implementation which corresponds to City Fiscal Years 2014 and 2015 (FY 14–15). Operationally, a series of individual technical reports, each focused on a specific channel area maintained during the first two years of the Master Maintenance Program, comprise the CMSS.

Within the framework of the CMSS, channel assessment and retrofit evaluation requires consideration of a number of factors including maintenance practices, environmental resource avoidance and minimization measures, adjacent infrastructure, and project alternatives. Combined, these elements address the specific terms of the underlying legal agreement for each focal channel and potentially allow the focal channels segments to be considered for retrofit and rehabilitation as part of future programs and projects. Beyond these efforts, the City is also soliciting additional project recommendations from the public.

The purpose of the candidate project list is to identify potential projects. Most candidate projects have been identified only at a basic conceptual stage, and more detailed investigation may find that they are not feasible. Implementation of projects on the candidate project list is also contingent upon funding availability.

Projects may be added to or removed from the candidate project list as additional data becomes available in the future. Factors considered when identifying projects to be included as candidate projects are summarized in sections 3.1 (retrofits) and 3.2 (stream, channel, and/or habitat rehabilitation) below.

### **3.1 Identifying Retrofit Candidate Projects**

As defined by the Municipal Permit, a retrofit is a “storm water management practice put into place after development has occurred in watersheds where the practices previously did not exist

---

<sup>1</sup> 2013. Settlement Agreement and Release. San Diegans for Open Government and Coastal Environmental Rights Foundation v. City of San Diego.

or are ineffective.” Potential projects can include, for example, disconnecting roof downspouts and impervious surfaces and redirecting them to pervious areas, installing rain barrels, or implementing green streets. The following factors are considered when identifying candidate projects:

- **Directly targets the City's HPWQCs and helps make progress toward Water Quality Improvement Plan (WQIP) numeric goals.**
- **Feasibility of project.** The feasibility of the project is an important consideration that takes into account a project's likelihood of obtaining funding, constructability, ease of implementation and operation, and any potential impediments. The project's viability takes into account the amount of resources City staff are able to commit to the project. Candidates that may place a considerable administrative burden on City staff, or that may require significant City resources to maintain and operate are generally less desirable projects and may be entirely infeasible.
- **Total area of high threat to water quality (TTWQ) properties.** The total area of inventoried existing development (industrial, commercial, municipal, and residential) classified as having a high TTWQ draining to a candidate project will be considered. The facility's or area's TTWQ is based on the prioritization processes discussed in sections 6.0, 7.0, and 8.0 of the JRMP document which takes into account the facility's or area's pollutant discharge potential and proximity to and sensitivity of the water body in which the area drains to.
- **Land use.** Land use of the area tributary to a potential retrofit project is an important consideration when selecting retrofit project candidates. Land uses commonly associated with the HPWQCs described above will be considered before other land uses. Commonly, agricultural areas and commercial nurseries are seen as likely sources of nutrients, since fertilizers are typically used during routine operations.
- **Multiple benefits of project.** Candidate projects with the potential to contribute to the overall enhancement of the local environment are preferred. Other benefits of retrofit projects can include, but are not limited to, the following:
  - Enhanced walkability or pedestrian safety and access
  - Community beautification, such as streetscape aesthetics or incorporating murals other features with significant artistic value
  - Improved flood protection
  - Improved access to green spaces or recreational opportunities
  - Environmental justice

- **Land availability.** If there is development bordering a potential stream segment on both sides of the stream, it would be difficult to complete a retrofit project. Similarly, land ownership is another factor to consider when identifying areas for potential projects. If the City owns the property where a project is being considered, that is the best case scenario. If another public agency, like a school district, owns the property, then that is second best, whereas, if the land is privately owned, especially if there are many land owners, the project could become more complicated to execute.
- **Amount of impervious area.** Projects that have the potential to treat a large area of impervious surfaces are ideal project candidates. Impervious surfaces are generally recognized as sources of common storm water pollutants such as oil and grease, heavy metals, and sediment (California Stormwater Quality Association, 2003).
- **Cost effectiveness.** Projects that are able to remove the greatest unit of pollution for the lowest cost are preferred. Long term structural best management practice (BMP) maintenance cost will also be considered.
- **Opportunities for infiltration or retention.** Ideal candidates will incorporate structural BMPs suitable for infiltration or retention. Infiltration is the most effective BMP, since it has close to 100 percent pollutant removal efficiency and also reduces runoff volume, and requires relatively low maintenance (California Stormwater Quality Association, 2003). Feasibility for infiltration BMPs should be conducted in accordance with the Storm Water Standards Manual. Since there are few areas within San Diego County where infiltration is feasible, other types of structural BMPs should be considered.

### 3.2 Identifying Stream, Channel, and/or Habitat Rehabilitation Candidate Projects

The Municipal Permit states that rehabilitation methods may include in-stream restoration, off-line storm water management practices installed in the system corridor or upland areas, or a combination of in-stream and out-of-stream techniques. Some of these techniques may include riparian zone restoration, constructed wetlands, channel modifications, and daylighting of drainage systems. The following factors are considered when identifying candidate projects:

- **Directly targets the City's HPWQCs and helps make progress toward WQIP numeric goals.**
- **Feasibility of project.** The feasibility of the project is an important consideration that takes into account a project's likelihood of obtaining funding, constructability, ease of implementation and operation, and any potential impediments. The project's viability takes into account the amount of resources City staff are able to commit to the project. Candidates that may place a considerable administrative burden on City staff, or that may require significant City resources to maintain and operate are generally less desirable projects and may be entirely infeasible.

- **Multiple benefits of project.** Candidate projects with the potential to contribute to the overall enhancement of the local environment are preferred. Other benefits of rehabilitation projects can include, but are not limited to, the following:
  - Enhanced walkability or pedestrian safety and access
  - Community beautification, such as streetscape aesthetics or incorporating murals other features with significant artistic value
  - Improved flood protection
  - Improved access to green spaces or recreational opportunities
  - Environmental justice
  - Improve the overall watershed conditions
- **Beneficial uses.** Stream segments with the following beneficial uses designated by the Basin Plan should be considered for rehabilitation before others:
  - Preservation of Biological Habitats of Special Significance (BIOL) – Includes uses of water that support designated areas or habitats, such as established refuges, parks, sanctuaries, ecological reserves, or Areas of Special Biological Significance), where the preservation or enhancement of natural resources requires special protection.
  - Cold Freshwater Habitat (COLD) – Includes uses of water that support cold water ecosystems including, but not limited to, preservation or enhancement of aquatic habitats, vegetation, fish or wildlife, including invertebrates.
  - Estuarine Habitat (EST) – Includes uses of water that support estuarine ecosystems including, but not limited to, preservation or enhancement of estuarine habitats, vegetation, fish, shellfish, or wildlife (e.g., estuarine mammals, waterfowl, shorebirds).
  - Freshwater Replenishment (FRSH) – Includes uses of water for natural or artificial maintenance of surface water quantity or quality (e.g., salinity).
  - Rare, Threatened or Endangered Species (RARE) – Includes uses of water that support habitats necessary, at least in part, for the survival and successful maintenance of plant or animal species established under state or federal law as rare, threatened, or endangered.
  - Inland Saline Water Habitat (SAL) – Includes uses of water that support inland saline water ecosystems including, but not limited to, preservation or enhancement of aquatic saline habitats, vegetation, fish or wildlife, including invertebrates.

- Spawning, Reproduction, and/or Early Development (SPWN) – Includes uses of water that support high quality habitats suitable for reproduction, early development, and sustenance of marine fish and/or cold freshwater fish.
- Warm Freshwater Habitat (WARM) – Includes uses of water that support warm water ecosystems including, but not limited to, preservation or enhancement of aquatic habitats, vegetation, fish or wildlife, including invertebrates.

Stream or channel segments with multiple beneficial uses, are desirable candidates.

- **Land availability.** If there is development bordering a potential stream segment on both sides of the stream, it would be difficult to complete a restoration project. Similarly, land ownership is another factor to consider when identifying candidate projects. If the City owns the property where a project is being considered, that is the best case scenario. If another public agency, like a school district, owns the property, then that is second best. Whereas, if the land is privately owned, especially if there are many land owners, the project could become more complicated to execute.
- **Amount of impervious area.** Projects that have the potential to treat a large area of impervious surfaces are ideal project candidates. Impervious surfaces are generally recognized as sources of common storm water pollutants such as oil and grease, heavy metals, and sediment (California Stormwater Quality Association, 2003).
- **Stream Geomorphic Conditions.** Streams that are susceptible to hydromodification due to increased runoff in the watershed are ideal for rehabilitation/restoration to mitigate for hydromodification impact. Stream rehabilitation/restoration may provide a greater water quality benefit for the overall watershed in mitigating hydromodification impact compared to hydromodification controls at the site level.

Appendix XIX, Attachment 1. Candidate Project List for the City of San Diego, San Dieguito Watershed Management Area

Project Identifier	Watershed Management Area	Jurisdiction	Ownership	Project Location				Project Size & Parameters				Other Notes
			Owner Information	Address	APN	Longitude (X-Coordinate)	Latitude (Y-Coordinate)	Contributing Drainage Area (acres)	Parcel Size (acres)	Project Footprint (acres)	Parameters (with units as necessary)	
<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting with Green Infrastructure</b>												
<p>Parcels on this list that are 0.25 acres or greater have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit sites for implementation of Green Infrastructure. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting</b>												
<p>Parcels on this list have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

Appendix XIX, Attachment 1. Candidate Project List for the City of San Diego, San Dieguito Watershed Management Area

Project Identifier	Watershed Management Area	Jurisdiction	Ownership	Project Location				Project Size & Parameters				Other Notes
			Owner Information	Address	APN	Longitude (X-Coordinate)	Latitude (Y-Coordinate)	Contributing Drainage Area (acres)	Parcel Size (acres)	Project Footprint (acres)	Parameters (with units as necessary)	
<b>Project Concept for Green Streets Retrofits – Quantity and Location of Suitable City Streets To-Be-Determined</b>												
<p>The City of San Diego is in the process of identifying potential public street locations that could feasibly be retrofitted with Green Infrastructure and provide a meaningful contribution to pollutant load reduction goals. As locations become verified for feasibility and effectiveness, funding mechanisms under an Alternate Compliance program could potentially be used to fill gaps in construction and maintenance funding necessary for the project to go forward. This is pending the ability to establish suitable legal mechanisms and verify that approvals and construction can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

Project Identifier	Watershed Management Area	Jurisdiction	Ownership	Project Location				Project Size & Parameters				Other Notes
			Owner Information	Address	APN	Longitude (X-Coordinate)	Latitude (Y-Coordinate)	Contributing Drainage Area (acres)	Parcel Size (acres)	Project Footprint (acres)	Parameters (with units as necessary)	
<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting</b>												
<p>Parcels on this list have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Project Concept for Green Streets Retrofits – Quantity and Location of Suitable City Streets To-Be-Determined</b>												
<p>The City of San Diego is in the process of identifying potential public street locations that could feasibly be retrofitted with Green Infrastructure and provide a meaningful contribution to pollutant load reduction goals. As locations become verified for feasibility and effectiveness, funding mechanisms under an Alternate Compliance program could potentially be used to fill gaps in construction and maintenance funding necessary for the project to go forward. This is pending the ability to establish suitable legal mechanisms and verify that approvals and construction can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Project Concept for Green Streets Retrofits – Quantity and Location of Suitable City Streets To-Be-Determined</b>												
<p>The City of San Diego is in the process of identifying potential public street locations that could feasibly be retrofitted with Green Infrastructure and provide a meaningful contribution to pollutant load reduction goals. As locations become verified for feasibility and effectiveness, funding mechanisms under an Alternate Compliance program could potentially be used to fill gaps in construction and maintenance funding necessary for the project to go forward. This is pending the ability to establish suitable legal mechanisms and verify that approvals and construction can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

Appendix XIX, Attachment 1. Candidate Project List for the City of San Diego, San Diego River Watershed Management Area

Project Identifier	Watershed Management Area	Jurisdiction	Ownership	Project Location				Project Size & Parameters				Other Notes
			Owner Information	Address	APN	Longitude (X-Coordinate)	Latitude (Y-Coordinate)	Contributing Drainage Area (acres)	Parcel Size (acres)	Project Footprint (acres)	Parameters (with units as necessary)	
<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting with Green Infrastructure</b>												
<p>Parcels on this list that are 0.25 acres or greater have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit sites for implementation of Green Infrastructure. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting</b>												
<p>Parcels on this list have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Project Concept for Green Streets Retrofits – Quantity and Location of Suitable City Streets To-Be-Determined</b>												
<p>The City of San Diego is in the process of identifying potential public street locations that could feasibly be retrofitted with Green Infrastructure and provide a meaningful contribution to pollutant load reduction goals. As locations become verified for feasibility and effectiveness, funding mechanisms under an Alternate Compliance program could potentially be used to fill gaps in construction and maintenance funding necessary for the project to go forward. This is pending the ability to establish suitable legal mechanisms and verify that approvals and construction can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

Appendix XIX, Attachment 1. Candidate Project List for the City of San Diego, San Diego Bay Watershed Management Area

Project Identifier	Watershed Management Area	Jurisdiction	Ownership	Project Location				Project Size & Parameters				Other Notes
			Owner Information	Address	APN	Longitude (X-Coordinate)	Latitude (Y-Coordinate)	Contributing Drainage Area (acres)	Parcel Size (acres)	Project Footprint (acres)	Parameters (with units as necessary)	
<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting with Green Infrastructure</b>												
<p>Parcels on this list that are 0.25 acres or greater have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit sites for implementation of Green Infrastructure. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Public Parcels Identified as Suitable for Further Assessment to Determine Feasibility of Retrofitting</b>												
<p>Parcels on this list have been assessed using broad assumptions necessary for computer modeling and were found to be potentially effective as an opportunity for contributing to load reduction goals. Considerable further assessment would be required before determining any of these sites to be viable retrofit. That assessment includes verifying public ownership, determining if land use agreements and financing can be established, assessing feasibility based upon further investigation of physical site constraints at a project design level, and determining that construction and necessary approvals, including approvals from regulatory agencies other than the City of San Diego, can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>

<b>Project Concept for Green Streets Retrofits – Quantity and Location of Suitable City Streets To-Be-Determined</b>												
<p>The City of San Diego is in the process of identifying potential public street locations that could feasibly be retrofitted with Green Infrastructure and provide a meaningful contribution to pollutant load reduction goals. As locations become verified for feasibility and effectiveness, funding mechanisms under an Alternate Compliance program could potentially be used to fill gaps in construction and maintenance funding necessary for the project to go forward. This is pending the ability to establish suitable legal mechanisms and verify that approvals and construction can be completed within the time constraints in the Municipal Storm Water Permit that pertain to Alternative Compliance.</p>
